

## SPECIAL ARTICLE / 10 BEST MEDICAL TOUR

### Refreshing experience of beautiful nature with your cleared eyes

#### Our systematic care for your eyes

We carry out dozens of thorough checkup for each patient. The accurate data obtained from the check up enable us to treat patients effectively and safely. We strive to develop a wider range of methods for treating patients with eye disease so that they can return to their daily lives earlier. We continue to invest in hi-tech eye treatment equipment.

### Advantage of Daejeon Eyecare Service

#### ▶ High Tech

Our laser-based cataract surgery is known for its safety as well as for rapid recovery of the patients.

#### ▶ Correction of bad astigmatism

Our LASIC eye surgery, which is effective in correcting bad astigmatism, has proven to be safe and excellent. It was introduced at the Journal of Cornea, which is specialized in cornea and conjunctiva.

#### ▶ Multifocal LASIC surgery

We have developed multifocal LASIC surgery for seniors, which is the first in the world, thereby helping senior citizens get by without glasses.

#### ▶ Ultra-precision technology

We have medical doctors specializing in laser-based ultra-precision LASIC/LASEC surgery using keratomileusis (a surgical procedure for correcting the refractive power of the eye to improve vision).

#### ▶ Lifelong care

We carry out pre-surgery thought checkup and gene test for patients to undergo eye surgery and examine their eyes periodically so that they can maintain good eyesight after surgery.

#### ▶ A visit to refreshing natural greenery

Looking at refreshing, natural greenery with your healthy eyes, you will feel as if you are starting to live your second life.
