Beyond healthcare to Hummancare

We provide hi-tech services for treatment of patients requiring intensive care, using rehabilitation training robots, artificial intelligence about cancer diagnosing solutions, etc. In addition, we strive to offer better patient services like appointment with a doctor and medical payment all via smart phone.

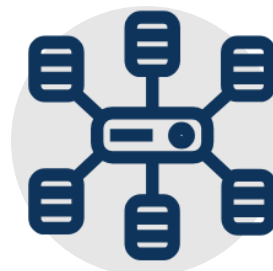

5 star hotel-level service

We provide 5 star hotel-level service to patients undergoing medical examination.

Full time care

In-patients have no need of their family members or caretakers hired by them because our nurses and nursing assistants fully take care of. Thereby, we help them reduce their expense, receive treatment more stably, and prevent them from contracting infectious diseases.

Artificial intelligence(AI)

A cognitive computing system called Watson for Oncology proposes optimal methods of treatment. With the help of Da Vinci surgery (robotic-assisted surgery), doctors can carry out surgery without scars in a method that helps patients recover promptly.
